Mercur	Hg	<0,5	ppm

Description/Production

Beige colored powder. Leather meal is a by-product when leather is produced. During the unique working-up process of the leather, no chrome is used. As a result leather meal is the perfect product for the fertilizer market.

Application

Leather meal is an excellent organic fertilizer for blending with other organic fertilizers in order to increase the nitrogen content.

This product is approved as a biological fertilizer according the EU degree No 2092/91

Packaging / Delivery

Bulk in keep-trucks, silo trucks
