

Sugar beet vinasses

Product Specification | PS 237281-1.1EN
Valid from: March 7, 2013

SAP QM no: 427
Page 1 / 1

Description

Sugar beet vinasses is a liquid product derived during ethanol production through fermentation of sugar containing juices from sugar beets.

Compliance

Regulation (EC) 767/2009 on the placing on the market and use of feed

Regulation (EC) 178/2002 laying down the general principles and requirements of food law, establishing the European Food Safety Authority and laying down procedures in matters of food safety

Regulation (EC) 396/2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin

Production is certified according GMP+.

Storage conditions

Sugar beet vinasses has a pH value of 3-6. To avoid chemical degradation of carbohydrates, the product should not be stored very long by temperatures exceeding 40°C.

Under appropriate conditions the product can be stored for months.

Labelling legal name

Feed material: Vinasses

Physical chemical

Moisture	45 %
Crude protein	17.5 %
Potassium	3-5 %

Whilst care is taken to ensure accuracy, legal liability is excluded to the extent permitted by applicable legislation. Due to unavoidable uncertainty in sampling and analytical results, deviations from specified data might occur occasionally. This specification is valid without any signature and it may be updated without prior notice.
